Hi Elizabeth,

The 1/16/15 memo from Hudbay contains all of the stormwater sulfate information available for the project. Please refer specifically to pages 87-89 of the PDF file, sixth column from the right called SO4 under the subheading "Major Ions (Total Recoverable in the table titled "ROSEMONT COPPER COMPANY STORMWATER SAMPLE WATER QUALITY DATA".

Hope this helps. Please let me know if you have any other questions.

Subject: quick question on stormwater quality data

Hi Mindy

I hope you are doing well. I have a question regarding the memo you directed me to regarding stormwater quality data for the USFS from Hudbay dated January 16, 2015. The memo attaches the pdf. files for stormwater quality data downstream of the proposed mine but does not include any data on sulfates.

Are there any additional documents that provide more detailed information on the stormwater quality data?

Thanks, Elizabeth
